## Concept<sup>®</sup> 616 3.1 MIL WHITE PROMOTIONAL VINYL CLEAR PERMANENT ADHESIVE

Concept<sup>®</sup> 616 is a 3.1 mil white gloss or matte flexible calendared PVC film coated with a permanent clear pressure sensitive adhesive laminated to 86# poly one side liner. This vinyl film is designed to accept a variety of solvent, eco solvent, latex and UV curable inks common to wide format digital printing systems. This adhesive produces permanent bonds to a variety of common substrates used in graphics applications. The 86# kraft liner will provide dimensional stability for digital printing and post processing.

Applications	Concept <sup>®</sup> 616 is designed for interior or exterior signage, decals, nameplates and point-of- purchase displays where a general purpose pressure sensitive adhesive is required.				
Thickness	Film Adhesive Liner (Thickness varia)	nce +/- 10%)	3.1 mils. .6 to .8 mils. 6.0 mils.	80 microns 15 to 21 micron 152 microns	s 140g/m²
Dimensional Stability	Good under normal conditions. High heat and age may accelerate vinyl shrinkage.				
Temperature Ranges	Minimum application temperature Service temperature Optimal printing temperature.			15°C -40°C to +82°C 38°C to 43°C	
Expected Exterior Exposure	Up to 2 years under normal exposure conditions.				
Adhesion Based on LPR test @ 24 hours	To stainless steel		40 Oz/in.	z/in. 11N/25mm	
	PSTC-101 Method A with 24 hr. dwell at 70°F (21°C) and 50% relative humidity. Typical values. Individual values may vary. Test thoroughly before production.				
Water Resistance Humidity Resistance	Good Good.				
Storage Stability	One (1) year shelf life when stored at 70°F (21°C) and 50% relative humidity.				
Product Codes	616-54G 616-60G 616-54M 616-60M	Gloss White Gloss White Matte White Matte White	(60" X 1 (54" X 1	164' roll) (1.37 ) 164' roll) (1.52 ) 164' roll) (1.37 ) 164' roll) (1.52 )	(50m) (50m)
Deserves additions	Completely evenerate inkiet solvents before application. Failure to do so may facilitate				

Recommendations

Completely evaporate inkjet solvents before application. Failure to do so may facilitate solvent penetration resulting in vinyl degradation.
